decision digital

Special Projects & Augmented Engineering

Complex Projects, Delivered Right

Overview

Decision Digital focuses on complex technology projects such as cloud migrations and infrastructure deployments. We utilize proven frameworks and secure practices to deliver projects efficiently, ensuring alignment with best practices for a modern, high-performing, and resilient environment.

Why Choose Us?

- Clear scope, timelines, and deliverables
- Engineering-grade execution standards
- Proven frameworks for complex projects
- Secure, compliant implementation practices
- Transparent communication at every stage

Special Projects

SharePoint Migration

- Modern site structure
- Structured content governance
- Intelligent workspace design

Email Migration

- Precision mailbox transitions
- Identity-aligned routing
- Compliance-ready configuration

Azure Infrastructure Setup

- Resilient cloud architecture
- Governance-driven controls
- Performance-optimized systems

Tenant-to-Tenant Migration

- Seamless tenant consolidation
- Cross-platform data integrity
- Unified policy alignment
