

# Virtual Dispatcher

Real-Time Triage & Dispatch Automation

## Overview

The Virtual Dispatcher uses AI-powered profiling, automated templates, and intelligent orchestration to process and dispatch service tickets in under 10 seconds—without human intervention. It eliminates workflow obstacles, boosts consistency, and accelerates your entire service delivery pipeline.

## Why Choose Us?

- Leaders in automated service delivery
- Deep ConnectWise workflow & PSA expertise
- Operational impact you can measure
- Strategic alignment with your business model
- Automated ticket dispatch in under 10 secs

## The Details

### Core Benefits

- Standardized ticket outcomes
- Faster service desk performance
- Technician time freed up

### Key Capabilities

- AI-driven ticket profiling
- Fully automated templates & parameters
- Optimized dispatch queue routing

### Ideal Scenarios

- High-volume service desks
- Inconsistent manual dispatch
- MSPs driving scalable growth

### Engagement Model

- Automation framework design
- Business-aligned deployment
- Ongoing operational enhancement

# Virtual Dispatcher

Real-Time Triage & Dispatch Automation

## How It Works

From creation to dispatch, every ticket is processed with machine-speed accuracy—no human intervention required.
