

No Downtime.
No Drama.
Just Email That Works.

**ZERO DATA LOSS. ZERO DOWNTIME.
TOTAL CONTROL.**

Why Decision Digital

On Exchange Server, Google Workspace, or something older nobody wants to admit to—we move you to Exchange Online cleanly. Mail, contacts, calendars, and folder structure come across intact, and your team keeps working while we do it.

Our Track Record

We faced several migration challenges and plan to tackle them. We successfully migrated mail environments for:

- ✓ SMBs with aging Exchange servers
- ✓ Fast-scaling organizations leaving Google Workspace
- ✓ MSPs consolidating tenant accounts
- ✓ Compliance-sensitive industries

Full Mailbox & Calendar Migration

Every folder, message, and calendar item moves over intact. No drops, no corruption, no mystery sync errors.

Secure, Compliant Setup

SPF, DKIM, DMARC, MFA, and anti-spam protections configured from day one.

Zero-Disruption Cutovers

Delta sync and staged, tested cutovers mean the switch happens quietly—usually before anyone notices.

Outlook & Device Config

Desktop, mobile, and shared mailboxes set up and ready, so nobody's left fighting their inbox.

Your email deserves a clean break.
Let's plan your Exchange Online migration.
